

## LOGISTICS

Logistics and logistics solutions are an integral part of the Polaris services. Two associated forwarding companies and customs brokerage contribute to seamless performance in international transport and customs clearance procedures - worldwide.

We offer our clients turnkey logistics solutions. We organize and control the complete flow of raw materials towards the production sites, no matter if they are being shipped from your nominated suppliers or from our own sources.

**Polaris co-ordinates & supervises the entire production process including door to door delivery of ready made garments.**

Our own Polaris logistics platforms in Asia and Europe are responsible for all customs issues and necessary formalities. They control the flow of goods to our factories and organize all shipment procedures when the goods are being shipped to you.

We offer elaborated solutions for our customers, with goods being shipped to your warehouse only, or directly door-to-door. No matter if you need one shipment

or multiple drop shipments, you will always have a complete and transparent overview of the status of your goods.

### FULL INSURANCE OF GOODS IN TRANSIT

Of course all the goods that are being shipped are fully insured by us, no matter what happens, your merchandise is in safe hands with Polaris. Should you need or wish a special warehousing solution for your shipments, we can organize and offer this service as well for you. Our logistics team can create an offer corresponding to your needs - just let us know!
